## EDUCATION

### University of Maryland

A. James Clark School of Engineering

*Bachelor of Science, Computer Engineering – Academy of Machine Learning, Data Science Minor*

College Park, MD

Cumulative GPA: 3.4

Expected: May 2026

#### Relevant Coursework

- **Digital CMOS VLSI Design Methods:** Cadence Virtuoso, layouts, performance design methods, ASICs, FPGAs
- **Electric Circuits and Lab:** Kirchhoff's laws, DC/AC analysis, Thevenin and Norton, Transfer functions, PSpice
- **Operating Systems:** Concurrency, Scheduling, Memory management, File systems, OS kernel development
- **Digital Logic Design and Lab:** Decoders, Sequencers, PLA, ROMs/PROMs, Verilog, FPGA
- **Digital Computer Design:** ALUs, index registers, stacks, interrupts, DMA, interfacing
- **Computer Organization:** Registers, memory, control, I/O, and addressing modes

## PROJECTS

### Google Maps List Dashboard

*Full-Stack Developer*

San Diego, CA

Mar. 2026 — Present

- Built a web application using the Google Maps Places API to ingest Places lists and display enriched location data with user-editable notes.
- Designed an interactive dashboard for efficiently browsing, organizing, and annotating large collections of saved Google Maps locations.

### UMD Dining Hall Menu

*Full-Stack Developer*

College Park, MD

Apr. 2026 — May 2026

- Built a responsive website with HTML, CSS, and JavaScript to display UMD dining menu data with dynamic filtering by diet and nutritional ratios.
- Wrote Python web scraping scripts to aggregate historical and current dining hall menus into a structured database for interactive use.

### Educational Wildfire Simulator

*Full-Stack Developer, Team Member*

College Park, MD

Mar. 2026 — May 2026

- Built an educational wildfire simulator in a 3-person team that fuses two machine learning pipelines—random forest regression acreage prediction and CNN image-based spread forecasting—into a single end-to-end experience.
- Designed and implemented the full-stack web app (UI, API, and inference services) that orchestrates both models, delivering seamless predictions and visual overlays from user weather inputs.

### Smart Submersible Marine Vehicle

*Team Leader*

College Park, MD

Sept. 2025 — Dec. 2025

- Led a team of 4 in creating an autonomous submersible marine vehicle to navigate and find an object underwater using a camera system and AI
- Designed and created the hardware and physical components of the submarine and managed the team

### C Shell

*Programmer*

College Park, MD

Apr. 2024 — May 2024

- Created a custom shell in C through the mastery of several components of C programming, such as:  
Process management, interprocess communication, signal handling, error handling, and pointer manipulation

## EXTRACURRICULARS

### Maryland Model United Nations

*Director of Recruitment & Outreach / Competitive Team Member*

College Park, MD

Sept. 2024 — Present

- Collaborate with executives to align recruitment with organizational goals, increasing new-member numbers by 40%
- Participate in high-pressure, fast-paced crisis simulations and make strategic decisions in real-time
- Develop public speaking, negotiation, and cooperative skills by engaging in and proposing innovative solutions
  - Earned the Outstanding Delegate award at the University of Chicago's Model UN Conference

### Hack4Impact-UMD

*Outreach Team Member and Videographer*

College Park, MD

Sept. 2025 — Present

- Collaborated with a student-led team to develop software solutions for nonprofit organizations, aligning technical work with social impact goals
- Developed and executed social media campaigns to increase visibility, engagement, and recruitment by 30%

### App Development Club at UMD

*Team Member*

College Park, MD

Jan. 2025 — Feb. 2026

- Collaborate with a team of 10 to organize club events, workshops, and hackathons focused on app development
- Manage video editing and content creation for club promotions, tutorials, and event highlights

### Institute of Electrical and Electronics Engineers at UMD

*Member*

College Park, MD

Sept. 2024 — Present

- Participate in technical workshops and seminars to stay current with industry trends and advancements
- Foster meaningful relationships to help mentees navigate academic and personal challenges

## SKILLS

**Skills:** Virtuoso, Java, C/C++, Python, MATLAB, Verilog, OCaml, PSpice, Oscilloscope, Excel, PowerPoint, Premiere Pro
